By accepting and reviewing this Presentation, you acknowledge and agree (i) to maintain the confidentiality of this presentation and the information contained herein, (ii) to protect such information in the same manner you protect your own confidential information, which shall be at least a reasonable standard of care, and (iii) to not utilize any of the information contained herein except to assist with your evaluation of a potential investment in the Company. The investment opportunity described herein will only be available to accredited investors on a private placement basis and consequently will not be subject to the prospectus and registration requirements of applicable securities laws and any securities described herein may be subject restrictions on transfer. This Presentation is not, and under no circumstances is it to be construed as, a prospectus relating to a distribution of any securities described herein. No sales of the securities of the Company shall be made until the Company and the potential investor enters into a subscription agreement for such securities. Prospective investors should carefully consider the risk factors described under “Risk Factors” in Appendix C of this Presentation before investing in the securities of the Company. This Presentation does not constitute and should be construed as legal, financial, investment or tax advice.

The securities of the Company have not been and will not be registered under any United States federal or state securities law and may not be offered and sold in the United States, except that securities may be offered and sold in to “qualified institutional buyers” and “accredited investors” in the United States pursuant to applicable exemptions from registration provided by the Securities Act of 1933, as amended (the “U.S. Securities Act”). Prospective investors will be required to represent, among other things, that they qualify as either “qualified institutional buyers” or “accredited investors”, and are familiar with and understand the terms of the offering and have all requisite authority to make such investment. The securities of the Company are not and may never be listed on a stock exchange and there is currently no market to resell any securities of the Company.

Forward Looking Statements

This presentation contains statements that may constitute “forward-looking information” within the meaning of applicable Canadian securities legislation. Forward-looking information may include, among others, statements regarding the future plans, costs, objectives or performance of the Company and its business, or the assumptions underlying any of the foregoing. In this presentation, words such as “may”, “would”, “could”, “will”, “likely”, “believe”, “expect”, “anticipate”, “intend”, “plan”, “estimate” and similar words and the negative form thereof are used to identify forward-looking statements. Forward-looking statements should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether, or the times at or by which, such future performance will be achieved. The forward-looking events and circumstances discussed in this Presentation, including completion of the proposed transactions described herein and the revenues that will be generated by the portfolio assets described herein, may not occur and could differ materially as a result of known and unknown risk factors and uncertainties affecting the Company, including risks regarding royalties or similar instruments, market price of the metals under royalties or similar instruments, the ability of the Company’s management to manage and to operate the business of the Company, and the equity markets generally. Forward-looking information is based on information available at the time and/or management’s good-faith belief with respect to future events and are subject to known or unknown risks, uncertainties, assumptions and other unpredictable factors, many of which are beyond the control of the Company. The Company does not intend, nor does it undertake any obligation, to update or revise any forward-looking information contained in this presentation to reflect subsequent information, events or circumstances or otherwise, except if required by applicable laws.

Investors are cautioned that any information released or received with respect to the transactions described herein may not be accurate or complete and should not be relied upon.

Cautionary Statements

Technical and Third-Party Information

Except where otherwise stated, the disclosure in this Presentation relating to properties and operations on the properties in respect of which the Company will acquire royalties or similar instruments or other interests is based on technical reports prepared and published by the relevant owner or operator in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101") and otherwise information publicly disclosed by the owners or operators of these properties and other information and data available in the public domain as at the date of this Presentation (except where stated otherwise), and none of such information has been independently verified by the Company. Specifically, as a royalty or similar instrument holder, Sandstorm Gold Ltd. ("Sandstorm"), as vendor, has limited, if any, access to properties included in asset portfolio to be acquired by the Company. The Company, as a royalty or other instrument holder following the completion of the proposed transactions with Sandstorm, may also have limited, if any, access to properties included in its asset portfolio. Additionally, the Company may from time to time receive operating information from the owners and operators of the properties, which it is not permitted to disclose to the public. The Company will be dependent, on the operators of the properties and their qualified persons to provide information to the Company or on publicly available information to prepare disclosure pertaining to properties and operations on the properties on which the Company will hold royalties or other interests. The Company will generally have limited or no ability to independently verify such information. The assumptions and methodologies underpinning estimates of mineral reserves and mineral resources on a property, and the classification of mineralization in categories of proven and probable and measured, indicated and inferred within the estimates of mineral reserves and mineral resources, respectively, and the assumptions and methodologies employed in proposed mining and recovery processes and production plans, were made by owners or operators and their qualified persons. Although the Company does not have any knowledge that such information may be inaccurate, there can be no assurance that such third-party information is complete or accurate or current. Disclosure in this Presentation is also based upon an independent analysis by the Company of such information to reflect the Company's expectations based on an operator's historical performance and track record of replenishing mineral reserves and the operator's publicly disclosed guidance on future production, the conversion of mineral resources to mineral reserves, drill results, the Company's view on opportunities for mine plan optimization and other factors. Some information publicly reported by operators may relate to a larger property than the area covered by the Company's royalty, stream or other interest. The Company's royalties or other interests in certain cases cover less than 100% and sometimes only a portion of the publicly reported mineral reserves, mineral resources and production of a property.

The technical and scientific information contained in this Presentation was reviewed and approved in accordance with NI 43-101 by Vincent Cardin-Tremblay, P. Geo (ogq #1386, PGO #3347), registered in the Provinces of Québec, and Ontario, the Chief Operating Officer of the Company, a qualified person under NI 43-101.

Market and Industry Data

Market and industry data presented throughout this Presentation was obtained from third-party sources, industry reports and publications, websites and other publicly available information, as well as industry and other data prepared by us or on our behalf, on the basis of our knowledge of the markets in which we operate, including information provided by other industry participants. The Company believes that the market and industry data presented throughout this Presentation is accurate and, with respect to data prepared by it or on its behalf, that the Company's opinions, estimates and assumptions are currently appropriate and reasonable, but there can be no assurance as to the accuracy or completeness thereof. The accuracy and completeness of the market and industry data presented throughout this Presentation are not guaranteed and the Company makes no representation as to the accuracy of such data. Actual outcomes may vary materially from those forecast in such reports or publications, and the prospect for material variation can be expected to increase as the length of the forecast period increases. Although the Company believes it to be reliable, it has not independently verified any of the data from third-party sources referred to in this Presentation, analyzed or verified the underlying studies or surveys relied upon or referred to by such sources, or ascertained the underlying market, economic and other assumptions relied upon by such sources. Market and industry data is subject to variations and cannot be verified due to limits on the availability and reliability of data inputs, the voluntary nature of the data gathering process and other limitations and uncertainties inherent in any statistical survey.

Trademarks

This Presentation may contain trademarks of third parties which are the property of their respective owners. The use or display of these third parties' trademarks is not intended to, and does not imply, a relationship with the Company or an endorsement or sponsorship by the Company.
